# Kenneth Wang

(1) 647-510-0066 | k572wang@uwaterloo.ca | github.com/KennethWang1| kennethwang.xyz

## Education

**University of Waterloo** Waterloo, ON

*Bachelor of Computer Science and Finance*

- **Relevant Coursework:** Data Structures, Algorithms, Computer Systems, Accounting, Economics

## Experience

**Software Engineer** 2026 – Present

*Marble Investments* *Waterloo, ON*

- Designed and built tools to visualize relations, investments, and cash flows between different companies, driving investment decisions
- Gathered and cleaned data using Python to create actionable figures
- Collaborated with analysts, providing technical viewpoint to investment theses
- Organized the sponsorship of external events

**Junior IT Consultant** 2025

*Best Western* *Montreal, QC*

- Upgraded local network infrastructure across 3 sites using Cisco equipment, maintaining 100% uptime during implementation
- Implemented guest device access controls across 5 workstations, enhancing network security and guest satisfaction
- Mapped out old LAN architecture, providing updated documentation to help modernize site infrastructure

## Projects

**ML Stock Trading Algorithm** | *Python, TensorFlow, Flask* 2026

- Engineered a Long Short-Term Memory (LSTM) neural network using TensorFlow to predict stock trends
- Constructed an automated data pipeline combining historical prices, company metrics, and news sentiment
- Built a Flask web application fed by live stock data APIs (Alpha Vantage), displaying real-time metrics

**Ethical Hacking Site** | *Linux, CloudFlare, Digital Ocean, Caddy* 2025-2026

- Re-engineered and hosted a web-based Capture The Flag (CTF) platform on DigitalOcean, serving **200+** students with interactive cyber security challenges
- Slashed cloud costs by over **50%** by migrating core services and deploying Caddy as a reverse proxy
- Authored system architecture guidelines, streamlining onboarding for incoming student maintainers
- Diagnosed and resolved a high-severity authentication bug

**365** | *UI/UX Design, Product Strategy, Framer* 2026

- Designed Framer prototypes for a mobile social platform centered on encouraging authentic daily interpersonal interactions
- Collaborated with teammates from various backgrounds
- Awarded **2nd** place out of 25 teams at the Western Design Competition 2026

**Seiche** | *Node.Js, Mongo DB, React Native* 2026

- Developed a mobile application allowing users to anonymously log illness symptoms and visualize local infection clusters in real time
- Leveraged MongoDB geospatial indexing and Node.js APIs to calculate disease proximity and query active reports within a 10-kilometer radius

## Technical Skills

**Languages**: JavaScript, HTML/CSS, Python, C++, Java, SQL
**Technologies & Libraries**: React.js, Tailwind CSS, HTML/CSS, TypeScript, TensorFlow, Pandas, NumPy, PostgreSQL, MongoDB, Caddy, nginx
**Developer Tools**: Docker & Docker Compose, Figma, Git & GitHub, Framer, DaVinci Resolve, OBS
